HOTEL LODGING MERCHANT ACCOUNT

United Bank Card understands the importance of streamlining the check-in/check-out process in the hotel industry. This is why we provide specialized services for hotel and lodging businesses to process guest payments quickly, securely and efficiently.

With United Bank Card's hotel and lodging services, you will not only be able to accept credit, debit and check services, but you will also be able to process full lodging application data, including check-in, check-out, folio number, date, and arrivals.

And more than that, United Bank Card can also help you to incorporate gift and loyalty card programs at your locations so that you can earn more, gather more information about your customers, promote brand loyalty, and give your customers incentive to return.

When you think about the possibilities with UBC's variety of payment options, it's clear that they're endless. Imagine being able to check in a guest inside their room or run the room service tab on their card while they're lying in bed. How about an ATM in the lobby earning you a few dollars every time someone uses it or a check reader linked to a check guarantee and conversion program that not only assures the check won't bounce, but banks it right away...

Whether the customer decides to use his/her card at the reception desk or the gift shop, you can be certain that the transaction will always be completed quickly and accurately with hardware and software from United Bank Card.
