WIRELESS MERCHANT ACCOUNT

We offer many payment processing products and services for wireless and other merchant types that qualify for this set-up.

The ability to accept credit cards from any location with wireless equipment is now available to businesses of all sizes. With the Comstar CHARGE ANYwhere®, accept credit cards wirelessly from the point of transaction while accelerating the sales process, improving efficiency and reducing paperwork.

Charge on the Go with United Bank Card

The ability to accept credit cards with wireless equipment is no longer a luxury afforded only to multinational companies and franchise chains. With UBC, you can go wireless and run credit cards and debit cards from anywhere on or off premises.

Utilizing wireless credit card transactions is the best way to accelerate the sales process, improve efficiency and reduce paperwork and it never fails to impress your customers.

Make Every Transaction a 'Card-Present' Transaction

As you probably know, any time you have to 'call-in' or 'key-in' a credit card transaction without the card itself present, you are charged a higher percentage by the credit card associations. But if you utilize the Comstar CHARGE ANYwhere wireless terminal, you can swipe credit cards from wherever you are, enabling you to qualify for "card-present" rates and avoid the extra fees associated with keying in transactions away from the customer.

And because United Bank Card likes to go two steps beyond what our customers expect, with our system you can now securely accept credit cards from ANYWHERE IN NORTH AMERICA within our extensive nationwide coverage!
